TECHNICAL DATA

Material:	0.024-Gauge Recycled Aluminum
Panel Length:	4' Lengths
Panel Width:	7 13/64" (Fits 5" & 6" K-Style and Half Round Gutters)
Panel Height:	1 17/32"
Box Quantity:	100 Feet Per Box (25 Pieces)
Screws:	100 Matching Stainless Steel Zip Screws
Colors:	16 Colors and 16-Ounce Copper
Rainfall Capacity:	12" Per Hour (For reference, the average hurricane in the United States drops less than 1" of rain per hour)

INSTALLATION

- Attaches to the lip of the gutter with zip screws.
- Goes under first row or starter row of shingles.
- There are no clips, hangers or brackets used.
- Does not attach or penetrate the roof.
- Easily bends to adjust to all roof pitches.

WARRANTY

Lifetime performance and material guarantee.

FEATURES

- **NEW** | Use the 5", 6", or 7" score lines for on-site fascia-mount installations with Zip Channel. These score lines are imprinted during manufacturing on both standard panels and high-flow panels.
- **NEW** | Endcaps are painted on both sides, removing the necessity for separate left or right-specific end caps.
- Pre-made inside miters with built-in diverter/splash guard
- High-water flow panels are perforated to handle concentrated, high volumes of rainwater such as first-story gutter below a second-story downspout. Also can be used on inside valley, metal and tile roofs.
- Reverse hem for added strength and to prevent wicking under the shingle.
- Baked-on polyester, low-gloss paint.
- Inter-locking panels.
- Two water-entry points.
- **NEW** | All panels and accessories are Wildland Urban Interface (WUI) compliant.
